

SPECIFICATIONS
ROMED URINE BAGS 1500CC AND 2000CC, STANDARD
REF: UB1.5LSTAND, UB2LSTAND
ROMED URINE BAGS 1500CC AND 2000CC WITH NON RETURN VALVE
REF: UB1.5LNRV, UB2LNRV

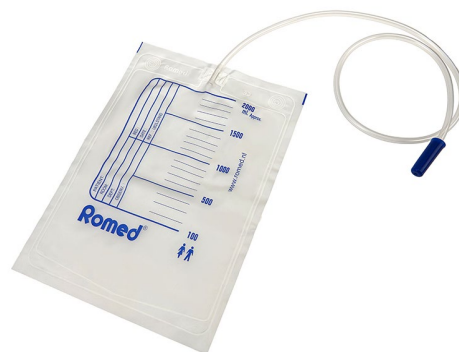

Applicable harmonized standard: EN ISO 8669-2:1996
 Medical device conform MDR (EU) 2017/745

Standard: UB1.5LSTAND / UB2LSTAND

Urine collection bag 1500cc/2000cc manufactured in translucent PVC with scaled measurements from 100cc to 1500cc/2000cc.

Tube length 90 cm.

Translucent tube hermetically sealed to the bag and fitted with a conical connector at the end adaptable to the patient's drain.

With non-return valve: UB1.5LNRV / UB2LNRV

Urine collection bag 1500cc/2000cc manufactured in translucent PVC with scaled measurements from 100cc to 1500cc/2000cc. Tube length 90 cm.

Incorporates a double plate in the upper part acting as a valve to avoid the return of fluids and gases.

Translucent tube hermetically sealed to the bag and fitted with a conical connector at the end adaptable to the patient's drain.

TECHNICAL SPECIFICATIONS

Component	Parameter	Specification
Bag	Foil	PVC
	Soldering	High frequency
	Capacity	1500cc or 2000cc
	Softener	Soybean oil
Non return valve	Material	PVC
Tube	Length	90 cm
	Diameter	0.5 cm
	Material	PVC, flexible
Connector	Material	PVC, white
Tap	Material	LDPE

Urine bags contain phthalates (DEHP)

Universal fitting for connection with catheters

Packing

UB1.5LSTAND / UB2LSTAND: 10 pieces in a bag, 250 pieces in an export carton

UB1.5LNRV / UB2LNRV: 10 pieces in a bag, 250 pieces in an export carton
