

PneumoDart

CE REF TM-317

NSN: 6515-01-655-9514

Vol. 800 per case, Total Weight: 16kg/35.2lbs

MOQ: Box (40 Per Box)

The PneumoDart is a reliable solution for treating a tension pneumothorax. Our veress safety tip needle is 3.25," which is the optimal length as recommended by the Committee on Tactical Combat Casualty Care (CoTCCC), who inspired the PneumoDart. We developed the Pneumodart with the US Department of Defense during a robust testing and evaluation phase. Our innovation helps you to get it right, first time, where successful decompression with traditional decompression needle can prove difficult. It offers better efficiency, safety and important physical features.

Details:

- 14 gauge x 3.25" chest decompression needle
- Veress safety tip to reduce the risk of puncturing internal organs when inserted
- Visible cap head to monitor air or blood leaving the chest
- Luer lock cap allows for an active drawing or elimination of air or blood from the chest
